

Revitalize & Energize Air Conditioning Systems with

Part Number: 4057-55

Nu-Calgon's A/C Re~New is a specially formulated treatment with years of proven field history in enhancing the performance of air conditioning and heat pump systems.

- OEM approved treatment
- Quiets noisy compressors
- Reduces energy consumption - lowers starting and running amps
- Improves heat transfer in evaporators
- Aids with sticking valves
- Aids in oil return with existing oil in R-22 retrofits

A/C Re~New is an established treatment for residential air conditioning systems, particularly older systems where performance may have diminished over the years.

In recent years, A/C Re~New has been successfully used to aid in oil return when converting an R-22 air conditioning system with a retrofit refrigerant; examples include R-427A, R-407C and others. A/C Re~New not only helps with oil return, it comprehensively renews the air conditioner by reducing friction in the compressor (lower amp draw), quiets the system and can aid in sticking flow control valves.

4 fluid oz. unpressurized can	4057-55
1 qt. unpressurized can	4057-54
A/C Re~New Injector Tool - 4 oz. capacity	4057-99

**Use with the
A/C Re~New Injector Tool**
