Bracket mounts to joist

Locator post

Bracket MOUNTS DIRECTLY TO JOIST(S) *for a super-secure fan/fixture installation!*

UL Listed
for Fans up to 70 lbs. • Fixtures up to 200 lbs.
CSA for fans/fixtures up to 50 lbs.

The **FB444** fan/fixture box is a 26.5 cubic inch box that mounts securely to single or double joists with a shipped-in-place center screw. A 2-hour fire rating, plus the ability to support fans up to 70 lbs. and fixtures up to 200 lbs. (for UL), make the FB444 an ideal choice for your installation.

The **FB442** and **FB443** are slightly smaller boxes, but offer the same great features and benefits.

Locator posts assure that the fan /fixture **bracket** is positioned properly for MOUNTING DIRECTLY TO THE JOIST.
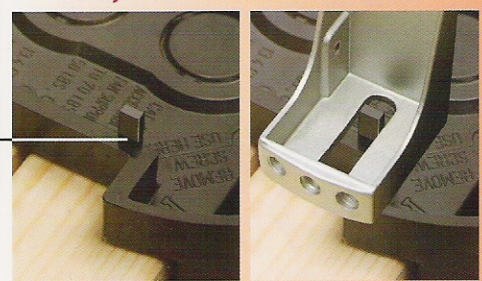

These boxes ship with an installed NM cable connector, mud cover, and captive installation screws for both the box and the mounting bracket.

FB442 INSTALLATION

1 Position **FB442** box alongside joist. Tighten center screw, mounting box to joist.

Note Drywall installation has been omitted.
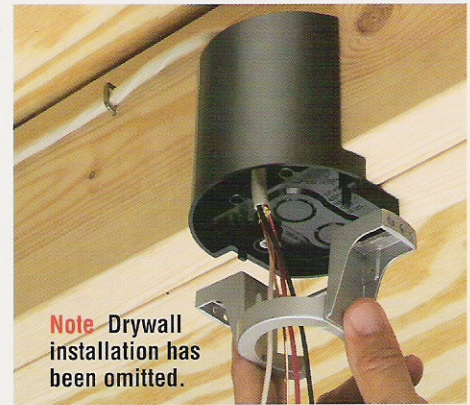

2 Pull wires. After finished ceiling is installed, remove bracket installation screws and use them to install the bracket (Step 3).

Locator post

**NOTE** Position mounting bracket over locator posts to assure proper postion.

3 Mount fan/fixture bracket using the installation screws you removed in Step 2.

4 Follow manufacturer's instructions to install fan or fixture.

FB444 OPTION

OPTIONAL If necessary, the bottom of the **FB444** box can be opened to re-stuff wires.
