MB8 *Mounting Block* with Built-in Box

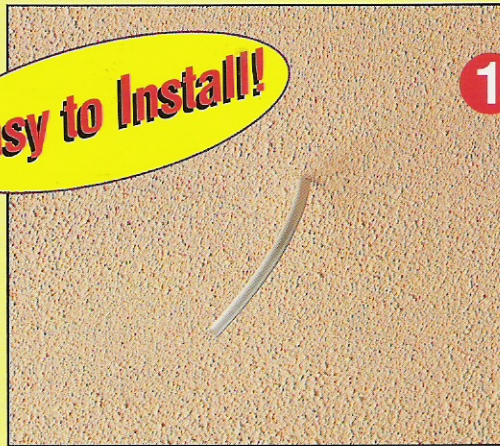

Mounts Fans, Fixtures, and More
directly to Ceiling Joist for **EXTRA-SECURE Support!**

▶ **It's a Ceiling Medallion and Electrical Box - Combined!**

▶ **For Supporting Ceiling Fans, Light Fixtures, Flood Lights, Smoke Detectors, - ANY fixture needing a Safe & Strong Installation**

▶ **Use as a Decorative Medallion too!**

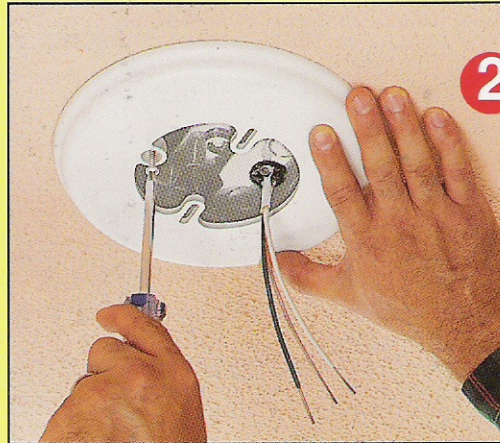

Easy to Install!

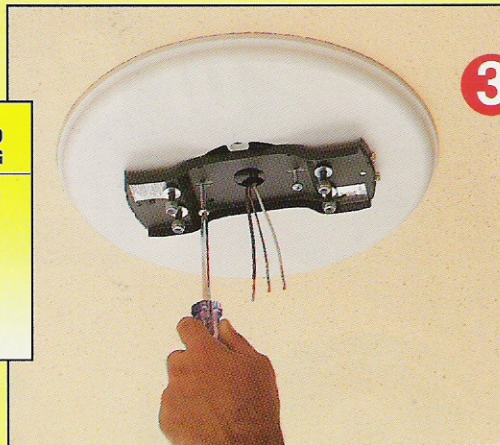

1 Locate the ceiling joist using a stud finder or similar device. Drill a hole approximately 1/2" in diameter, in the ceiling next to the joist.

There's no need to cut the ceiling drywall!

Remove desired knockout. Insert the cable connector into the opening, and pull the NM cable through the connector.

2 Using the #8 x 1-1/2" wood screws (provided), mount the MB8 to the joist (through the ceiling).

3 Install the fixture or fan mounting bar (provided with fixture or fan) directly to the joist with the (2) #10 x 3" wood screws and lock washers provided.

Wire the fixture or fan following the instructions included with the product.

Comply with all local electrical codes and regulations.
