

The Revolutionary Dimplex Linear Convectors

Dimplex[®]
Better solutions through innovation

Heat that fits.

The smallest,
smartest
heater for
your home!

The new LC Series linear convectors
redefine home comfort.

Smart design – inside and out – reveals a more compact, better performing heater that also gives you maximum floor plan flexibility.

These contoured convectors come in lengths from 20" to 60" (including a wattage range of 500W to 2500W) to accommodate any home or renovation. All sizes are designed for use with a wall or top-mounted built-in thermostat (sold separately).

Enjoy **heat that fits** with compact LC Series heaters!

Enjoy more wall space than ever before

LC Series convectors are up to **42% smaller** than conventional baseboard heaters, so you have more flexibility with furniture placement than ever before. Plus, the contoured design and slim profile suit any décor and minimize intrusion.

Wattage	Traditional Baseboards	LC Series	Reduction
500	28.5"	20"	30%
750	38.5"	25"	35%
1000	49"	30"	39%
1250	56"	35"	38%
1500	67"	40"	40%
2000	85"	50"	41%
2500	103"	60"	42%

Smaller
Faster
Smarter

Faster heat with all-new design

Both its compact size and top discharge design deliver dramatically faster heating. LC Series convectors move a concentrated heat flow into your room **40% faster** than conventional baseboards.

Real comfort through reduced heat loss

A revolutionary element design generates rapid heat flow to **reduce heat loss into the wall by 10%**. The new shark-fin element quickly guides heat out of the heater to maximize room heating rather than warming the heater itself.

Quick comfort via rapid airflow

Greener

LC Series convectors require fewer raw materials, packaging materials and shipping space. A better choice for our environment.

Cat. No.	Description	Rating
DTK-SP	Single pole built-in thermostat kit	120-240V, 17A 347V, 14A
DTK-DP	Double pole built-in thermostat	120-240V, 17A 347V, 11A
DTKT-SP	Double pole built-in tamperproof thermostat kit	120-240V, 17A 347V, 11A
DTKT-DP	Single pole built-in tamperproof thermostat kit	120-240V, 25A 347V, 11A

- Note: 1. Standard color is white.
2. To order almond, omit "W" in Cat. No.

Dimplex is committed to better solutions through innovation, quality and customer service. New product development has long been a hallmark of Dimplex North America, with over 30 patents in electric heating innovation and others pending including three for the LC/LPC Series. All product research and development, as well as manufacturing of the new LC and LPC Series, is based in Canada.
