

Anti-Vibration Mount™

Isolates the disposer in a cushion of rubber, which reduces the transfer of noise and vibration from the disposer to the sink.

SOUNDSEAL	PRO ES, PRO COM, SEPTIC
SOUNDSEAL PLUS	PRO XL, PRO CC

Quiet Collar™ Sink Baffle (Antimicrobial)

Baffle design causes running water to pool in sink opening. The resulting thin "water dam" acts as a cap on the disposer and reduces the amount of noise that comes up through the sink opening. All Evolution PRO Series™ models are made with rubber treated with an antimicrobial substance that inhibits the growth of bacterial odors.

SOUNDSEAL	PRO ES, PRO COM, SEPTIC
SOUNDSEAL PLUS	PRO XL, PRO CC

Anti-Vibration Tailpipe Mount™

Mounts the tailpipe in a cushion of rubber that reduces the vibration transmitted to downstream plumbing, in turn reducing noise.

SOUNDSEAL	PRO ES, PRO COM, SEPTIC
SOUNDSEAL PLUS	PRO XL, PRO CC

Hear Less.

What is SoundSeal™ Technology?

A combination of advanced insulation and anti-vibration components, SoundSeal is at least 40% quieter than standard disposers.*

SoundSeal Technology in:
PRO Essential / PRO ES
PRO Compact / PRO COM
Septic Assist / SEPTIC

SoundSeal Plus™

Disposers with SoundSeal Plus are at least 60% quieter than standard disposers.*

SoundSeal Plus Technology in:
PRO Excel / PRO XL
PRO Cover Control / PRO CC

* Results may vary depending on test conditions. Claims are based on average sound values over a sampling period using the Association of Home Appliance Manufacturers (AHAM) test load.

SoundLimiter™ Insulation

Wrapped around the unit itself, this single layer of open cell insulation muffles noise emitted by the disposer.

SOUNDSEAL PLUS	PRO XL, PRO CC
----------------	----------------

Multi-Layer SoundLimiter™ Insulation

Multiple layers of open and closed cell material both muffle and trap noise emitted by the disposer.

SOUNDSEAL PLUS	PRO XL, PRO CC
----------------	----------------

Listen to this.

- Q Will the system be so quiet I won't know it's on?
- A No. You'll know it's on by its quiet hum.

- Q The disposer moves a little when I watch it under the sink. Is this normal?
- A Yes. The anti-vibration mounts were designed to allow the disposer some movement. The mounts isolate this movement, minimizing vibration and noise.

- Q Can I now run the disposer while talking on the phone?
- A Yes. Especially in models equipped with SoundSeal Plus™, you'll typically hear little but the sound of running water.

- Q What about when it grinds really tough items like bones?
- A You will hear hard food items in the grind chamber, but the sound will be considerably quieter than that of any other disposer on the market.

Evolution PRO Cover Control™

The extra assurance of covered operation.

All the great features that set the Evolution PRO Series™ apart, plus an extra margin of assurance. Activated by the magnetic CoverStart™, it runs only when the cover is on. Two grind stages let you quickly grind difficult foods you wouldn't put in a standard disposer, like celery and potato peels. At least 60% quieter than a standard disposer.

PERFECT FOR

Those seeking an extra margin of assurance in the kitchen.

FEATURES

- MultiGrind™
- SoundSeal Plus™
- Magnetic CoverStart™ Activation
- Auto Reverse Grind System™
- 40 oz. Stainless Steel Grind Chamber
- Stainless Steel Grind Components
- Quick Lock® Sink Mount
- Sink Baffle (Antimicrobial)
