

UpperHand™ Fish Tapes

Keeps Wrist Straight

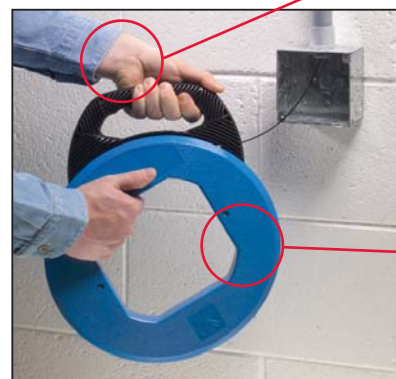

UpperHand's™ ergonomic handle keeps the angle of the user's wrist in a straight and locked position to reduce wrist strain.

UpperHand™ Fish Tapes

Ease of Use

Interior grip fits the user's palm, reducing the number of pressure points common on most fish tapes.

Traditional Fish Tapes

Awkward

Standard fish tapes force the user's wrist into an awkward position creating wrist strain.

Uncomfortable

Standard fish tapes are not ergonomically designed to fit comfortably in the user's palm.

How Does the UpperHand™ Compare?

Full Line UpperHand™ Fish Tapes

Exclusive Handle Design
Revolutionary shape provides unparalleled ease-of-use

Built-In Hang Hole
Simplifies merchandising and keeps display neat

Impact-Modified Housing
Withstands drops onto concrete of 25' and more

Overmolded Rubber Grip
Improves operation and control

Plated Carbon Steel Tape

Nylon/Fiberglass Tape

Standard Carbon Steel Tape

Introducing eight new solutions to make wire fishing easier and safer. With tape lengths from 50' to 250' and a choice of 3 types of tape material, the UpperHand™ product line offers solutions for every hand-pulling application.

Five Year Warranty

REVOLUTIONARY THINKING

Designed for Easier Fishing

A Whole New Handle

GB's extensive field testing identified what contractors really want in a professional fish tape. The result is the UpperHand™ - a fish tape with a truly innovative "ergonomic" handle. The handle keeps the user's wrist in a normal, upright position to reduce strain and enhance productivity on the job.

Improved Interior Grip

Rubber over-molding, formed to fit the user's palm offers a minimum of pressure points for the most comfortable grip on the market today. Superior ease-of-use makes the UpperHand™ the fish tape of choice among contractors.

A Tape for Every Job

Standard Carbon Steel

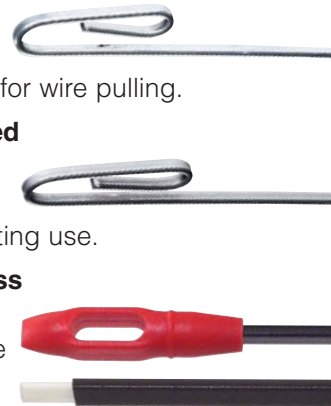

Tried-and-true, tough and economical solution for wire pulling.

Corrosion-Resistant Plated Wire (the R series)

The toughest, most durable tape for long-lasting use.

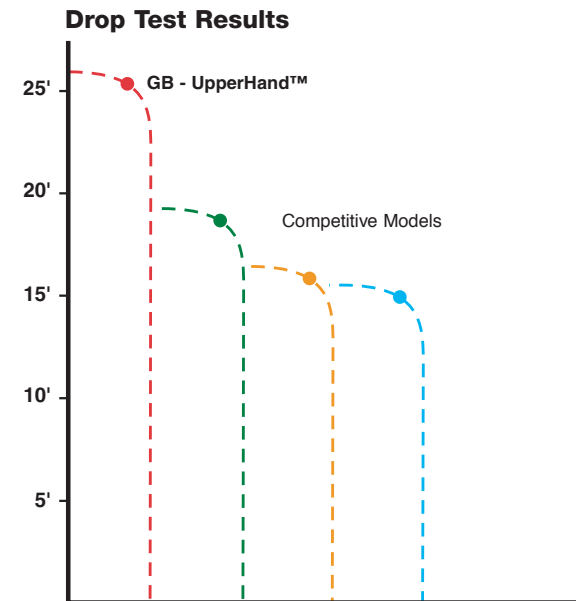

Non-Conductive Fiberglass Core with Nylon Jacket

Exclusive non-conductive tip and unique flat shape is easier to feed yet able to pull up to 500 lbs.

Tougher Than the Competition

UpperHand's™ improved design leads the industry by withstanding 25' drop tests without breaking.

The Fiberglass Advantage

The Lightest Tape Around

At just 1/10 the weight of traditional models, the FTN-50R and FTN-100R are the most portable and easy-to-use fish tapes available today.

The Easiest Tape to Fish

Use the Fiberglass UpperHand™ to gently fish wire through conduit that already contains cable. The tape's exclusive flat shape glides easily to prevent damage.

Exclusive Non-Conductive Tip

Constructed of high-impact ABS in a streamlined design, the exclusive tip pulls up to 500 lbs while preventing hang up in the conduit. Non-conductive fabrication prevents accidental shorting of live conductors.

Fish Tapes Like No Other!
