MASONRY BITS

Quick Change Carbide Tipped

MAS-SET-9

Performance and Versatility

Made for the Professional.

The NEW Quick Carbide Tip Change Masonry Bits have a one-piece hardened carbon steel body and hex shank to provide a stronger bit that will not disassemble when drilling in deep or tough materials. They are hammer drill rated with a carbide grade tip for faster penetration, easier drilling and longer bit life.

Versatility and Value

In addition, the NEW Quick Carbide Tip Change Masonry Bits have a 1/4" quick-change hex so they can be used in quick-change chucks, conventional adjustable drill chucks, and hex adapters for more versatility. The 9-piece set includes bit diameters and lengths most commonly used by electricians.

Features

- One piece hardened carbon steel body and hex shank for a stronger, more concentric bit that will not disassemble when drilling in deep or tough materials.
- Carbide grade tip for faster penetration and longer bit life.
- Hammer drill rated for use in either standard or hammer drills.
- 1/4" quick-change hex for fast bit changes. Use in quick-change chucks, conventional adjustable drill chucks, and hex adapters for more versatility.
- Set includes diameters and lengths most commonly used by electricians.
