

- ▶ **Description**
Cartridge Kit replacement for Sloan Waterfree Urinals.
- ▶ **Specifications**
 - Cartridge Kit - Engineered to last for at least 7000 uses
 - Cartridge is made from recyclable ABS
 - Sealant Liquid - 100% biodegradable
 - Cartridge Installation/Removal Tool (Key)
 - Protective Glove
 - Disposal Bag
- ▶ **Features**
 - Uses no water
 - Mechanical-free design
 - Patented, sealing locking cartridge
 - Biodegradable Cartridge Sealant Liquid eliminates odors
- ▶ **Benefits**
 - Improved hygiene and safety
 - Reduced water and sewer costs
 - Water supply piping not required
 - Odor-free
 - Easy installation and replacement

How It Works

1. The cartridge begins full of liquid with a layer of proprietary biodegradable sealant that floats on the surface.
2. Waste enters the cartridge and passes through this sealant which isolates foul odors from the restroom.
3. Flowing waste is slowed by internal baffles that help retain sealant and allow the uric sediment to settle.
4. Waste flows past an internal trap and exits the cartridge leaving some of the uric sediment behind.
5. The urine accelerates as it is funneled down to a flexible spout where it is redirected out of the housing and into the drain pipe.

Preserves our Natural Resources and Saves Costs

There are four primary functions of the cartridge system.

- The cartridge acts as a funnel, allowing liquid from the bowl to flow into the cartridge.
- The cartridge holds the sealant liquid. As liquid waste enters the cartridge, our sealant liquid creates a barrier between the waste and open air, thus eliminating odors.
- The cartridge acts as a filter for uric sediment. Much of the sediment that can cause drainage pipe corrosion is trapped at the bottom of the cartridge.
- The cartridge allows the remaining waste to be freely disposed of down the drain.

ANSI/ASME A112.19.19-2006

Meets the American Disabilities Guidelines and ANSI A117.1 requirements when installed according to these requirements.
