

WATERFREE URINAL CARTRIDGE KIT

The WES-150 Sloan Waterfree Urinal Cartridge is the main component and is installed at the base of the urinal.

The replaceable liquid-sealed cartridge filters waste so liquids enter the drain and sediments are collected for disposal when the cartridge is replaced after 6,000 to 7,000 uses. Waste passes through a layer of Sealant, continues through a trap and flows around a Patented Baffle to prevent the loss of Sealant. A Discharge Tube in the housing directs the flow of waste into the building drain system. The Cartridge is designed as a replaceable component once depleted.

WES-150

Kit includes:

- Cartridge made from recyclable ABS
- Sealant Liquid — 100% biodegradable
- Cartridge Installation/Removal Tool
- Protective Glove
- Disposal Bag

Product Number: WES-150

Product Code: 1001500

Color: White

Quantity/pack: 1

Quantity/case: 32

Refills:

Cartridge

- Uses no water
- Patented, Sealed Locking Cartridge
- Biodegradable Cartridge Sealant Liquid eliminates all odors
- Improves hygiene
- Easy installation and replacement
