## MegaPressG Cap

### Features

CSA Approved  
UPC Approved  
IMC Approved

Temperature Range: -40°F to 180°F  
Max. Operating Pressure: 125 psi

Viega® introduces six new cap configurations into its MegaPressG product line.

Viega's MegaPressG cap is designed for use with the MegaPress black iron pipe joining system. The new design allows installers the ability to easily terminate a piping run without threading.

The MegaPressG cap uses Viega's press end technology, eliminating the need for threading connections and saving valuable time.

The MegaPressG cap is provided with a factory installed HNBR sealing element, a 304 stainless steel separator ring and a 420 stainless steel grip ring approved for use in heating fuel oil, natural gas, compressed air and vacuum applications.

Made of the finest quality carbon steel, the MegaPressG cap is constructed with the patented Smart Connect® feature. The Smart Connect feature is a quick and easy way for installers to identify connections that need pressing.

Viega MegaPress fittings are designed for use in piping systems utilizing ASTM A53, A106, A135, and A795 Schedule 5 to Schedule 40 black iron pipe.

Part No	Size
25731	1/2"
25736	3/4"
25741	1"
25746	1 1/4"
25751	1 1/2"
25756	2"
