MegaPress® Cap

Viega® introduces six new cap configurations into its MegaPress product line.

Viega's MegaPress cap is designed for use with the MegaPress black iron pipe joining system. The new design allows installers the ability to easily terminate a piping run without threading.

The MegaPress cap uses Viega's press end technology, eliminating the need for threading connections and saving valuable time.

The MegaPress cap is provided with a factory installed EPDM sealing element, a 304 stainless steel separator ring and a 420 stainless steel grip ring approved for use in hydronic heating, compressed air, fire sprinkler and cooling water applications.

Made of the finest quality carbon steel, the MegaPress cap is constructed with the patented Smart Connect® feature. The Smart Connect feature is a quick and easy way for installers to identify connections that need pressing.

Viega MegaPress fittings are designed for use in piping systems utilizing ASTM A53, A106, A135, and A795 Schedule 5 to Schedule 40 black iron pipe.

Features

UPC Approved
IMC Approved
FM Approved
UL Approved

Temperature Range: 0°F to 250°F
Max. Operating Pressure: 200 psi

Part No	Size
25730	1/2"
25735	3/4"
25740	1"
25745	1 1/4"
25750	1 1/2"
25755	2"
